

Pleblab Analytics Bounties

We're setting up analytics infrastructure for **Pleblab** and breaking it down into clear bounties.

Pleblab

Bounty 1: Initial Data Infrastructure

 **Goal:** Set up the foundation for analytics.

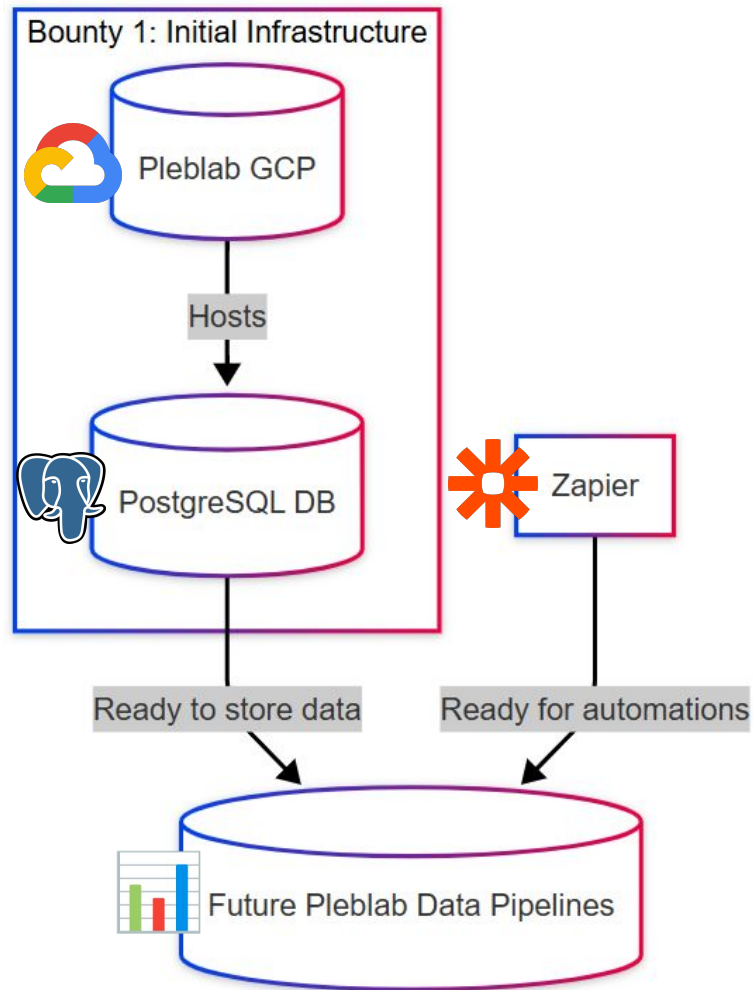

- ◆ Deploy a PostgreSQL database on Pleblab's GCP infrastructure.
- ◆ Set up a Zapier instance to handle future data pipelines.

 **Scope:** No tables or pipelines—just infrastructure setup.

 **Deadline:** Tuesday, March 4

 **Reward:** \$50 USD

Bounty 2: Fetch Data from X

 **Goal:** Create a pipeline to collect data (e.g., followers, following) from X.

- ◆ Set up a database table in the analytics DB.
- ◆ Create a Zapier pipeline to fetch & update data periodically.
- ◆ Deliver a basic Looker Studio dashboard for validation.

 **Scope:** No frontend or full dashboard—just data collection.

 **Deadline:** Tuesday, March 29 (Two weeks after Top Builder)

 **Reward:** \$100 USD

Bounty 2: Data Pipeline from X

Future Bounties

- All future bounties will follow the same model as Bounty 2, focusing on collecting specific metrics.

- Next Bounties:

Google Analytics

- Frontend/dashboard development will be handled as different bounties.
